

DeLaval

Cow Mattress M40R

Robust top cover

Water-repellent wrapped foam

High compression

Anti-slip surface

DeLaval mattress M40R has an 8mm thick top-cover which is robust and easy to clean. The foam underneath the mat is durable and elastic to give your cows a consistently soft resting place.

The M40R also offers a high level of slip-resistance. This is thanks to two factors: one, the light grip pattern on the top-cover; and two, because the mattress is soft, which allows the cow's claws to sink into it. The good traction encourages cows to lie down and get up whenever they want. In other words, they can behave in a natural way as if they were out in the pasture.

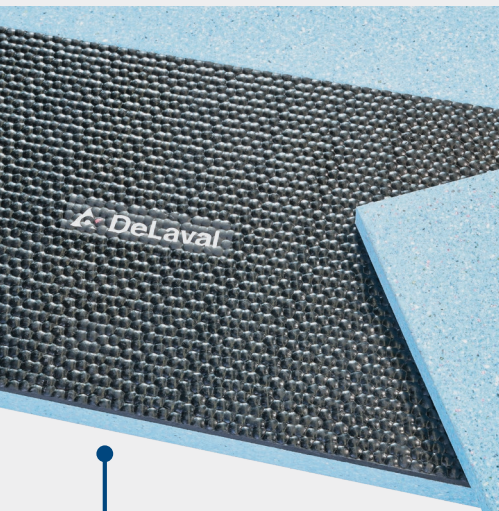

Individual results may differ; information does not constitute warranty/guarantee of service or performance.

DeLaval

Cow Mattress M40R

Seamless top for easier cleaning and better hygiene

30 mm thick PU-latex foam is soft and wrapped in a plastic foil

Measurements

Thickness	40mm
Length	5-50m
Width	1800-2000mm
Compression	26.9mm

Most suitable for:

- ☒ Dairy cows
- ☒ Heifers
- ☐ Calves

Recommended for:

- ☐ Tied up
- ☒ Loose housing
- ☐ Calving pens

Works well with DryMaxx™

With a top layer of your usual bedding or a bedding conditioner like DryMaxx™ you can keep the surface of the mat even cleaner and drier.

Comfort rating

Deformability and elasticity class 3 according to DIN 3763
